

WHAT IS STAR SERVICE?

Our commitment to the commercial HVAC industry has remained unchanged since we began in 1952. We became an industry leader in preventative maintenance, design-build services and installations because we disagree with businesses and models focused on expensive unit repairs.

Instead of prioritizing inefficient, costly repairs, we focus on long-term maintenance plans that transfer the risk to us while keeping your system functioning at its peak performance. By partnering with our clients, we provide plans that actually benefit them and reduce their costs. Servicing most brands and industries, no job is too small or large for us.

THE STAR SERVICE DIFFERENCE:

Product-independent

We service most makes and manufacturers to remain objective and provide our clients with the best possible solutions.

Preventative Approach

No one in this industry operates like us. We make the financial investment to keep your equipment running; if something breaks - we repair it at our expense

Expert Technicians

Our team members are consistently trained to stay up to date on new systems and practices.

Custom-tailored

We develop unique plans and schedules to optimize the functionality of almost any system.

Responsive

We have the team, capability and parts to quickly respond to issues that appear.

THE PROCESS:

1. Concept Presentation

Our first step is presenting you with our concept to determine if it is a match for your organization.

2. Building Survey

We catalogue your equipment and identify risks while performing a system analysis to determine the financial impact.

3. Ongoing Maintenance

Our technicians perform proactive maintenance and replace any parts before they fail.

4. Consultation on Building Improvements

At Star Service, we consistently work with you to mitigate risks and find additional savings.

SERVICES PROVIDED:

Maintenance

Air conditioning maintenance is our core business. We want to save you money through improved maintenance. It is our goal to reduce costs, enhance comfort and improve the reliability of your systems.

Design-Build

Whether you are renovating an existing building or trying to solve a recurring problem, we can provide innovative cost-effective HVAC system solutions. If you need to upgrade or replace an existing system, we can design a solution that will minimize disruption, downtime and expense.

Energy Management

Star Service's engineering and controls team can identify and prioritize the best opportunities for savings.

Building Automation & Controls

We have successfully implemented cost effective HVAC control strategies in many buildings, saving customers thousands of dollars. Our technicians and engineers will assist you in determining the most cost-effective approach for installing a control system that is state-of-the-art, easy to use, and delivers improved energy efficiency.

Explosion-Proof Systems

We install and maintain explosion-proof enclosures to meet NEC requirements.

Refrigerant Management

Refrigerant management is a complex process that requires proper recordkeeping and monitoring. Star Service works to ensure our customers are in full compliance with Section 608 of the Clean Air Act Amendments and the requirements of 40 CFR Part 82, Subpart F.

Commissioning

Our team performs commissioning and retro-commissioning work so your system functions properly and consistently performs at a high level.
